ABSTRACT

This document is a HTML template file for WWW10 poster proceedings.

Keywords

Please specify your own designated keywords here.

1. INTRODUCTION

All pages must fit in A4 size paper (21.0cm x 29.7cm). The top and bottom margins should be 2.54cm. The right and left margins should be 1.9cm. The content should run into two columns with 0.83cm gutter. The title should extend across both columns with the author information under it. Usually, authors should include their names, affiliations, addresses and emails. A telephone number is optional.

The paragraph should be fully justified. Please leave extra vertical space (6 points) between the paragraphs. First-line indent on new paragraphs is optional.

2. Typesetting

The main body text should use a 9-point Times Roman font. Please follow the style defined in this document for the title, authors and section headings. There is NO need to leave a blank text box at the lower left corner of the first page as the previous version of this template suggested.

2.1 Page Numbers

Please do not include page number in your submission. They will be added in the final publication.

2.2 Figures and Table

Figures and tables can either be put in a single column or be extended to both columns. The figures and tables should be numbered and captioned. Captions should be in 9pt Times New Roman bold. Please place the figures and tables close to the text referencing them.

2.3 References and Citations

The reference should be numbered so that citation can be made by putting a number inside a square bracket (e.g.

[1]). The list of reference should be given in the end of the document before the Appendix (if any).

3. ACKNOWLEDGEMENTS

If you have any acknowledgement, please put it right before the Reference section.

4. REFERENCES
