

The Internet and Education A Scottish Perspective

Gordon Thomson
Director, Scotland & Ireland
Cisco Systems

Agenda

- **The Internet, Education and Productivity**
- **The New Learning Environment**
- **Scotland Leading the Way**
 - Scottish Schools Digital Network**
 - Cisco Network Academies in Schools**
- **Conclusions**

The Internet, Education and Productivity

Issues Facing Government

Education and skills development

Growth of GDP and standards of living based on investment in IT and networking

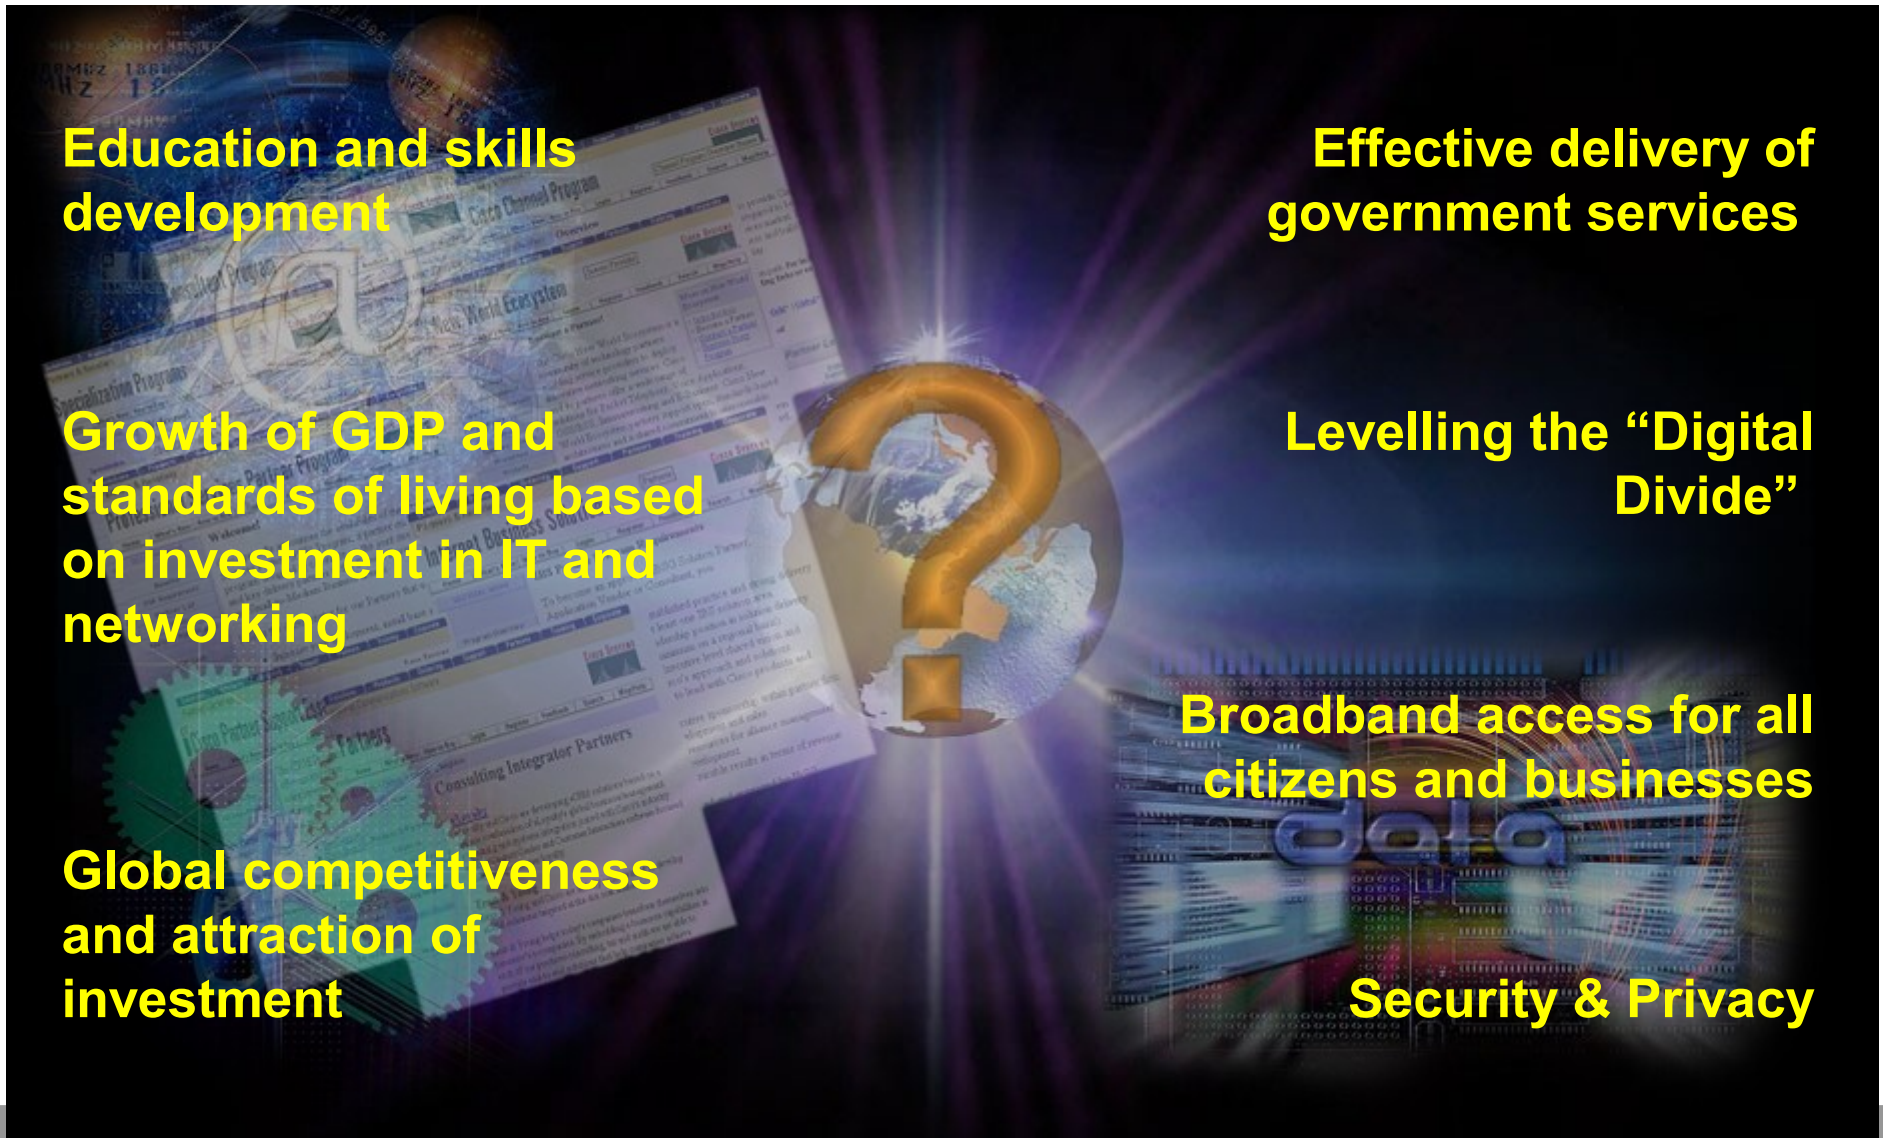

Global competitiveness and attraction of investment

Effective delivery of government services

Levelling the “Digital Divide”

Broadband access for all citizens and businesses

Security & Privacy

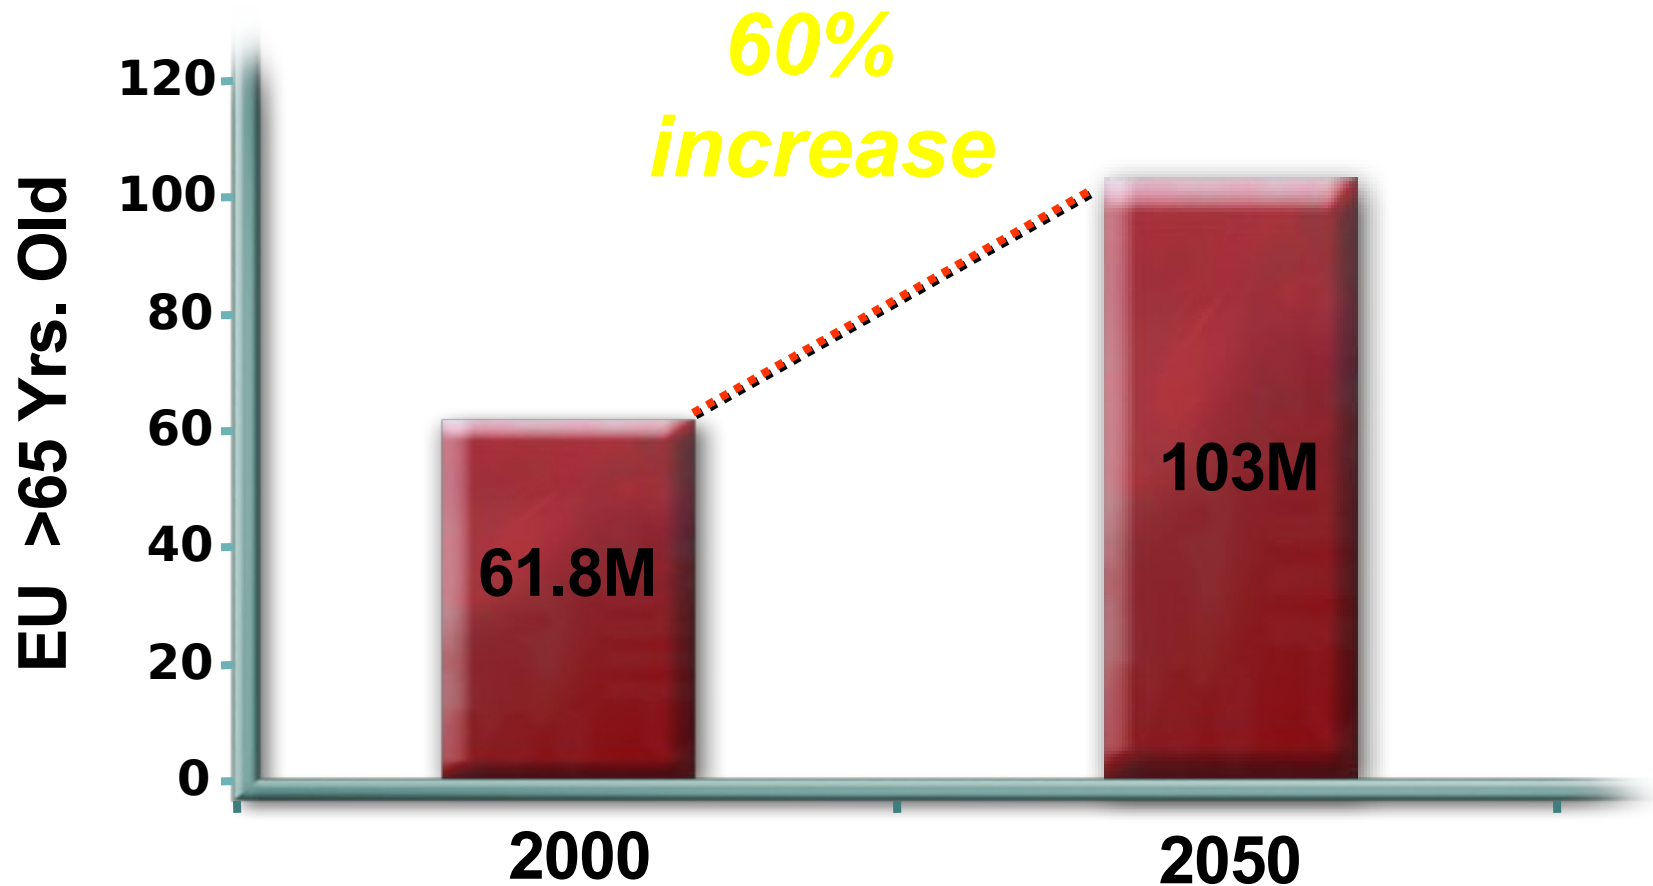

The industrialized world faces a Productivity Imperative

- **A Demographic Crunch is coming . . .**
- **More retired people, and fewer workers means . . .**
- **Workers must be more productive than today's workers, or our standard of living will erode dramatically**

Education needs to be the foundation to improve the productivity of our future workforce

Global Equalizers

Internet and Education

The New Education Environment

The Reality

Education is not a place.....

Innovation

..... It's a Process

What is Innovation?

It used to be about IP....

...now its about collaboration

Does Education Mean IQ

PQ

Education's New Differentiator

Connect

Collaborate

Compete

Scotland Leading the Way

Education at a “Technology Tipping Point”

- **Governments:**

Integration of technology into classrooms is major focus for educators & governments

Teacher shortage: 35% of teachers to retire over next 10 years

Higher expectations via accountability (eg. NCLB)

- **Educators:**

Augment teacher's ability to reach a distributed student body

Learning more collaborative: web-sharing, video conference.

Record the class, assist absentees or for review purposes

Utilize specialists & subject matter experts

- **Students:**

Students comfortable with technology and the internet

Students lives are hectic & fraught with schedule conflicts

Background to Local Education Circumstance

The promise of the internet 10 years ago was of

‘a huge library based system offering infinite easy to find sources of information on every conceivable subject’.

- ❑ National Initiatives & Strategy - SSDN**

18 month roll out for CDI

- ❑ Local Initiatives & Strategy**

- ❑ Pupil and Teacher needs**

What do Teachers want..?

- ❑ **No more changes now - too many already..!!**
- ❑ **Ease of use - mixed ICT confidence & skills**
- ❑ **Benefits to teaching process & classroom**

The internet's great. I'm sure there's everything I want up there. However, I don't have the time to spend wading through the ** to get to where I need to be..! Please make it easy for me.**

Teacher @ BETT 2004 [widely held opinion]

Basic Objective of CDI

Deliver content in the most efficient manner.

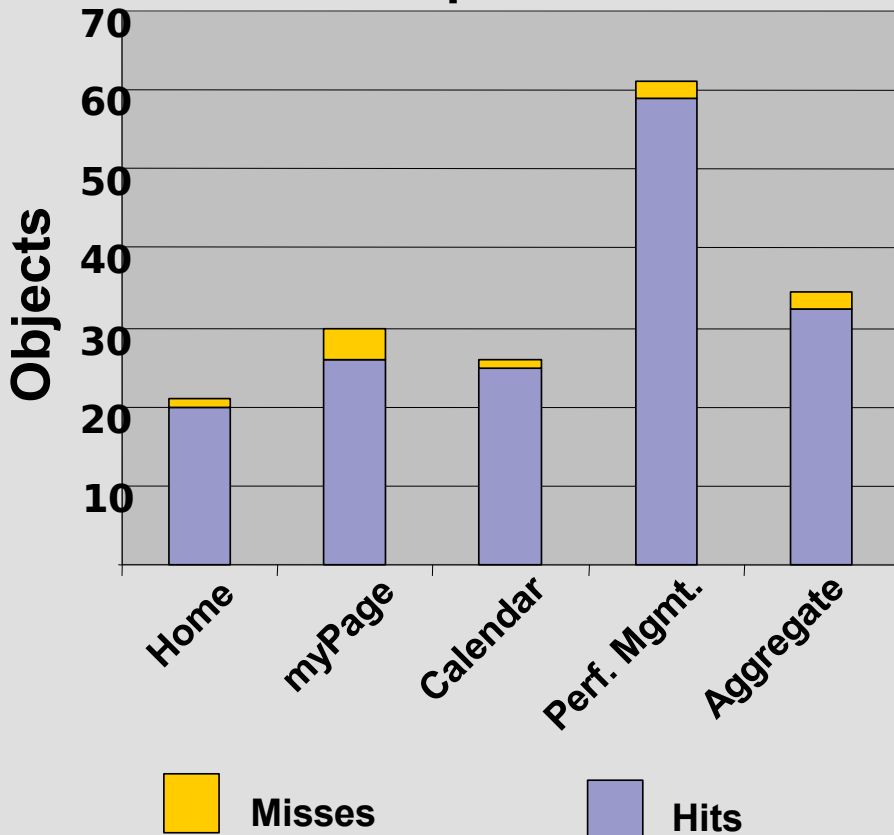

CDI allows the Local Education Authorities to maximise the impact of communicating via the web by overcoming the bandwidth issues of delivering rich-media to the desktop.

CDI ensures that high quality video and rich audio are delivered with fast response times, and large graphics and other high bandwidth files can be delivered with speed, accuracy and consistency.

Predictable, High Quality Application Performance

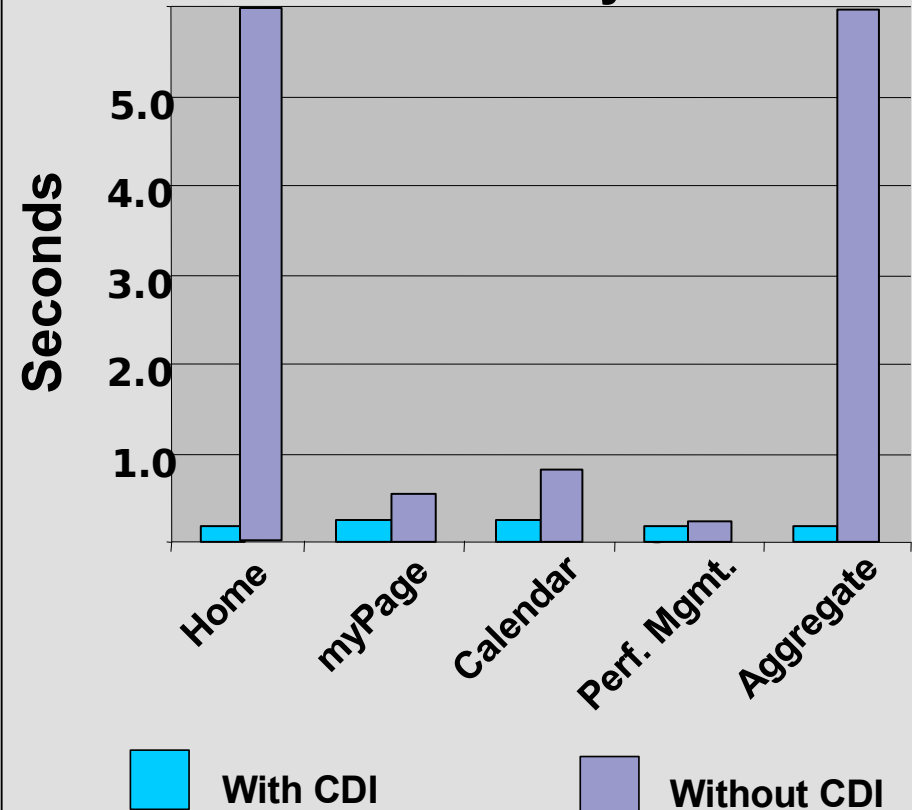

Vast majority of application requests locally served

Requests

Significant performance increase
(30 ms vs 5-6 second response times)

CE Latency Benefit

Content - 3 Types served by CDI

On-Demand Content:

Acquired, cached and delivered by school triggered demand.

First client request for each piece of content - retrieved from original Web Server and provided by Content Engine which also stores/caches same.

Pre-Positioned Content:

Means of distributing content and populating Content Engines in a managed CDI Environment (managed Centrally or at other levels e.g. LEA).

Bandwidth intensive content e.g. Java Apps, Flash, Shockwave

Live Content:
scheduled for distribution to Content Engines during off-peak hours.

Acquired as live streaming broadcast from Satellite/Terrestrial

Source. CDI configures policies for acquiring live multimedia.

Advantages of CDI

Faster content (whatever form) to the network edge / classroom:

Bandwidth and Cost Savings

50% increase in throughput generally.

80% in Education Environments (hitting same page more often).

Centralised Management @ National & Local levels.

Drive On-Line Content Standards Nationally & Locally.

Stats / Reporting on usage / content value.

Pre-Positioning is the REAL ADVANTAGE

Real time access to required content – no waiting

Improved productivity for Teacher and pupil

Improved Learning Experience

Cisco Networking Academy Program

« Public Private Partnership between Cisco, Governments, Educational Institutions, NGO, and industry, created to teach students how to design, build and maintain computer networks »

cisco learning community

Cisco Networking Academy Program

A Global Success—<http://cisco.netacad.net/public/index.html>

43,000 + Online Tests Daily
22,185,730 Total Tests Taken

10,590 Academies
151 Countries/Territories/Entities

25,408 Instructors

523,161 Students
Currently Enrolled

Networking Academies in Scotland

- **Social Inclusion Academy Program**
- **Delivered in partnership with local regeneration companies in Glasgow**
- **Objectives**
 - **Shortage in local IT workforce**
 - **Create Careers, not jobs – social improvement**
 - **Make IT training more accessible, give people a chance**
 - **Make IT resource more accessible for SME's**

Govan Initiative – The First in Europe

- **The Benefits**
 - **Jobs for long term unemployed**
 - **IT professionals available to local SME's**
 - **Improved community spirit and recognition**
 - **More money invested locally**
 - **Now being replicated across Glasgow**
- **Now being taken in Glasgow Schools**
- **Being integrated through 'Scottish Qualifications Authority'**

Conclusions

Some Personal Thoughts.....

- We need a new education experience
- We cannot fail any of our children
- We need to make all pupils productive future employees for our sustainability
- Give them passion
- Allow them curiosity
- Its a long road but we have started off on the right track
- Education and the Internet are the foundation!
